25X1B

25X1A

Comment. The data contained in paragraphs 1 and 2 of the report cover the actual incoming and outgoing shipments at the depot. The information contained in paragraphs 3 and 4 includes the actual turnover at the depot in addition to shipments only forwarded by the supply installation without originating at it. The volume of supply traffic reported in paragraph 3 is therefore higher than that mentioned in paragraph 2. The supply goods listed in paragraphs 2 through 4 of the report were consigned to GOFG and army ration supply depots.

25X1B

For the first time since July 1952, outgoing shipments exceeded incoming shipments in January 1953; in February, they were at about the same level, while in March, outgoing shipments were about 50 percent lower than incoming shipments. The officers mentioned are known to be mess officers.
